7. Pumpkin (Calabaza)
8. Squash (Calabacín)
9. Sunchoke (Alcachofa de Jerusalén)
10. Sweet Potato (Camote)

### ADDITIONAL NOTES:

- **Peppers, Tomatoes, & Tomatillos** are better producers in the Spring & Fall, & may struggle without help in staying warm in the Winter & cool in the Summer. Best time to plant them was yesterday.
- **Artichokes** are short lived perennials that produce their flowers in Spring & Summer, & will produce more with age.
